Gambling With Friends: RPG Edition — GM cheat sheet

Print both pages. You play from your own phone like everyone else; the PC console is for stepping in. Every number here is the live default (change any of them in **GM › Config**).

0 · ADDRESSES

GM console	`gwf-rpg.netlify.app/gm`
TV	`gwf-rpg.netlify.app/?code=XXXX` (the console gives the link + QR)
Phones	scan the TV's QR, or type the 4-letter code at `/phone`
Game Lab / QA	`/lab` · `/lab/?qa=1` · phone size `?phone=1`
Classic fallback	`/classic` — the old one-computer build, no backend needed

1 · BEFORE PEOPLE ARRIVE (15 MIN)

1. If Supabase has been idle a week it **pauses** — open the console the afternoon before and make sure a room loads.
2. Open **/gm** on the PC that drives the TV. Set the **GM PIN** (you will type it on your phone too).
3. **Create a room**: mode (Free-for-all for a first night), tier 1, size Regular, fog on. Note the room code.
4. **Open TV** → drag the window to the TV, full screen, **click it once** so sound is allowed.
5. Scan the QR with your own phone and join. Add it to the home screen.
6. **Ledger** panel: type each player's real buy-in (a record only — the app never moves money).
7. Teams mode only: set the teams in **Table** before Start.

2 · CREATION (5–10 MIN)

- Each phone: look → class → **stat gamble** (10 chips, stake 1–5 per game, 10:00 on the clock) → Lock in → vault pull → pets → Ready.
- **Spotlight** (Rig & Spotlight) up to 4 phones on the TV so the room watches the gambles.
- Returning players pick a **veteran** from their roster; a dead name is gone for good (Wall of Names).
- Starting Health: let phones spin the **Buy-in Wheel** (80–150) or press **Flat start** (100). Then **Start the run**.

3 · A TURN, IN ONE LINE

Roll / spin / draw (your boots decide) → step up to the roll → resolve the hex → action (shop, bag, attack, challenge) → **End turn**. Clock: **1:30 per turn, banks to 5:00**, ends the turn at zero; it **stops while the monster acts**.

> The first lap is the tutorial. Watch the **Proxy & Autopilot** panel: it shows who the table is waiting on.

4 · WHEN SOMETHING HAPPENS

Situation	Press
Phone dead / silent 30 s	Its prompt appears on the console → **Act for this phone** (Proxy) or Skip. Back in play when the phone returns.
Someone leaves for good	**Autopilot** on their seat (bot plays), or **Kick**.
Swapped phones	Table › **Reconnect** hands the seat to the new device; or scan the QR, the seat is remembered by name.
Pizza	**Pause** — every phone and clock freezes.
Wrong result / argument	**Undo** (one event per press) or restore a **Restore point**. Take one before raids.
Rule feels off	Change the number in **Config** → Apply. Do not argue, tune.
Want a dramatic spin	**Rig**: pick the stream (wheels, dice, loot, challenge, pets) and the result; the next draw lands there, animated.
Challenge dispute / stall	Challenge lists › live card: **Drop Back In** → pick the winner. External games need both phones' "Who won?".
Stuck in a fight or pool	Table › **Reset Cartridge** (clears effects, last safe hex).
Boss too tame / too mean	**Monsters**: take over (play its hand yourself), re-spin its mood, move or spawn one.
Table is slow	Config → `table.lastCallMinutes` (default **100**): the run ends on placings at that time.
Someone finds a bug	They tap 🐞 on their phone. **Bugs & rewards** → **Reward** 🎡: secret wheel on their phone only.

5 · NUMBERS TO REMEMBER

Players	up to 8, tuned for 4–6
Chess clock	+1:30 per turn, bank cap 5:00
Proxy after	30 s of phone silence
Death to a monster	miss 1 turn, wake at 50% Health
Death to a player / boss	miss 2 turns, lose a level
Inn / Potion	+15 / +25 Health
Monster hit cap	never more than 60% of max Health in one hit
Citadel gate	level 10 *or* a Citadel Key (every region boss drops one; it survives death)
Last Call	100 min after Start → placings decide
Vault	survivors bank 3 items, the dead bank 1

6 · HOW RUNS END

Free-for-all / Royale	throne reached, or last one standing
PvP only	last one standing (player kills eliminate)
PvE only	the Dealer dies, or everyone does
Teams	last team standing, or the Dealer dies
Any mode	Last Call, or **End run** on the console

7 · THE END OF THE NIGHT

1. TV shows the **recap**; each phone picks its **vault** items and may save a **veteran**.
2. **Ledger & Recap**: placings, buy-ins and what was vaulted, one row per player; Hall of Fame updates itself.
3. **Export** the room JSON before closing the laptop (it has the whole night, bug reports included).
4. Pets, vault, veterans and the Hall of Fame carry over; everything else is rolled fresh. A season is 8 nights.

8 · TROUBLESHOOTING

- **TV behind or frozen** → reload the TV tab; nothing is lost, the room is the event log.
- **No sound** → click the TV window once; Run › Sound test.
- **Phone can't join** → needs internet (same Wi-Fi not required); type the code at /phone; tap the Reconnect banner if it joined before.
- **Room "gone"** → /gm, enter the PIN, pick it from the list. Rooms live in the backend, not the browser.
- **Backend down** → **/classic** on the PC; the GM presses every button, no phones.

9 · CONSOLE PANELS

Table	seats, ready, kick, reconnect, teams, reset cartridge
Run	start, pause, end run, undo, restore points, sound test
Config	every tunable, per room; Sheet import
Rig & Spotlight	force the next draw; pin phones to the TV; grant Gold/Health, teleport
Challenge lists	the live challenge, Drop Back In, presets, trivia bank
Monsters	fights in progress, take over, moods, spawn, move
Proxy & Autopilot	who the table waits on; act for a phone; bot a seat
Ledger & Recap	buy-ins, placings, season totals
Bugs & rewards	reports, notes, the secret reward wheel
Export	room JSON out / in
